

I strongly disagree with NAB's petition 04-160 .
As a paying customer of satellite radio, I have the right to listen to whatever I want to. Satellite radio is no different than comparing cable tv and antenna based tv. Is there any reason to remove The Weather Channel from cable to please local tv stations? How does this make sense?

Also, I have the ability to listen to weather in multiple cities throughout the US with satellite radio. I cannot get nationwide weather info from FM or AM radio.
